# BACK PAIN AND HEADACHES ARE THE MOST COMMON PAINS SUFFERED BY PEOPLE<sup>1</sup>

Recommending pain relief doesn't have to be painful for pharmacy staff. Over-the-counter (OTC) treatments can be effective in managing common pain conditions, so you can make a real difference to patients and help reduce the headache of frustrated patients.

Pharmacists and pharmacy team members play a valuable role in offering informed self-care advice to patients, taking into consideration age, existing health problems or personal choice. If your patients are coming to you because they're struggling to find something that works for them, they're not alone. In fact, a survey of 1000 UK shoppers showed that 57% with body pains have trouble finding OTC pain relief that work for them.<sup>1</sup>

These patients should have tried ibuprofen or paracetamol already but not got the relief they want for their mild to moderate pain. That's where the expert advice of the pharmacy team comes in.

**23.5%** want better options to relieve their pain<sup>1</sup>

If codeine combinations are your go-to recommendations for these patients, it might be time to reconsider.

Around 60% of pharmacy staff think codeine combination products are the most effective pain relievers from a range of OTC analgesics.<sup>3†</sup> Research shows a paracetamol + ibuprofen combination is actually more effective when it comes to easing patients' pain for up to 12 hours.<sup>2\*</sup>

Did you know BASH and NICE guidelines do not recommend the use of opioids including codeine in acute headaches such as headache or migraine?<sup>4,5‡</sup>

## IT CAN BE HARD FOR PATIENTS TO FIND THE RIGHT PAIN RELIEF<sup>1</sup>

BASH, British Association for the Study of Headache.

<sup>\*</sup>Based on a clinical trial. <sup>†</sup>Online survey of 205 UK pharmacy staff comparing product recommendations for various type of pain, including Nurofen. <sup>‡</sup>OTC codeine is only available as a combination product, not as a single active.

## TIME TO TRY SOMETHING ELSE?

If a patient has already tried paracetamol or ibuprofen but have not got the relief they needed, you now have a new GSL option available to help them get back to feeling like themselves – **Nuromol Dual Action Pain Relief**.

**What makes Nuromol Dual Action Pain Relief different to single active products?**

**Nuromol Dual Action Pain Relief** contains interlocking paracetamol and ibuprofen,<sup>6</sup> which are released simultaneously to deliver a combination effect<sup>7</sup>

**Simple and convenient dosing:** Take 1 tablet, if 1 tablet does not control symptoms a maximum of 2 tablets may be taken, up to 3 times a day<sup>7</sup>

### **1x Nuromol Dual Action Pain Relief tablet**

Provides **statistically superior pain relief than a 1 g paracetamol + 30 mg codeine** combination up to 12 hours<sup>2\*</sup>

6s & 16s also available.

## THINGS TO REMEMBER<sup>7</sup>

- Advise patients Nuromol Dual Action Pain Relief cannot be used alongside other oral or topical NSAIDs or paracetamol
- To minimise side effects, it is recommended that patients take Nuromol Dual Action Pain Relief with food
- If patients still need pain relief after using Nuromol Dual Action Pain Relief for 3 days, they should see their GP for advice

\*Based on a clinical trial.

## CUSTOMER CONVERSATIONS

A 25-year-old lady

"I've got a sore back from sleeping funny and I really need to get on with things"

- She has had back pain for a couple of days but no other symptoms
- She is not taking any other medication
- She has tried standard ibuprofen but it hasn't helped in relieving her pain

**Paracetamol is not recommended for use on its own in NICE's low back pain guidelines<sup>8,9</sup> and, as standard ibuprofen has failed to ease her pain, Nuromol Dual Action Pain Relief could give her the relief she needs to get on with her day.<sup>7</sup>**

A 46-year-old man

"I twisted my ankle yesterday!"

- He has a painful ankle joint that is tender and swollen
- He can move his ankle and is able to bear his weight
- Doctor advised self-management with PRICE and OTC pain relief<sup>10</sup>
- He has been taking paracetamol but the ankle is still swollen and he wants something else to manage the pain

**As the patient is not getting the relief he wants with paracetamol alone, a combination ibuprofen + paracetamol formulation like Nuromol Dual Action Pain Relief could help.<sup>7</sup>**

Recommending effective pain relief doesn't have to be painful

# THINK NUROMOL DUAL ACTION PAIN RELIEF FIRST CHOICE FOR SECOND-LINE OTC PAIN RELIEF<sup>2,7</sup>

# THE SELF-CARE OPPORTUNITY FOR PHARMACY

Community pharmacy has an important role to play in self care:

Ensures better physical health

Help manage chronic conditions

Improve healthcare access

Free up GP time

Reduce emergency admissions

## Improving health literacy and promoting self-care

### Self-care advice – NICE<sup>1</sup>

- Antibiotics are ineffective for cold & flu viruses and may have adverse events
- Adequate fluid should be taken to compensate for fever and mucous secretion
- Remain as active as possible without feeling significant discomfort
- Wash hands with hot water and soap to get rid of any germs that may have been picked up

# COLD & FLU SYMPTOMS MAY DIFFER

Signs and symptoms <sup>2</sup>	Cold	Flu
Symptom onset	Gradual	Abrupt
Fever	Rare	Usual
Aches	Slight	Usual
Fatigue, weakness	Sometimes	Usual
Sneezing	Usual	Sometimes
Chest discomfort, cough	Mild to moderate	Common
Stuffy runny nose	Common	Sometimes
Sore throat	Common	Sometimes
Headache	Uncommon	Common
Cough	Common	Common

**IMPORTANT:** if a patient has symptoms and suspects they might have COVID-19, or if they have had a positive test, please follow the latest government guidance which you can find on the NHS website.

## How you can help patients

Messages to share with patients during cold & flu consultations:<sup>3</sup>

### CONSIDER

The correct dosage & administration of any medications – including duration of usage

### TELL THEM

What to expect in terms of symptom relief

### LET THEM KNOW

When to expect improvement in symptoms

### LOOK OUT FOR

Any red flags to watch out for

### REACTIONS

What to do if there is no improvement or if an adverse reaction is experienced

### ADVICE

When to return to the pharmacy or ask for advice

### CONSIDERATION

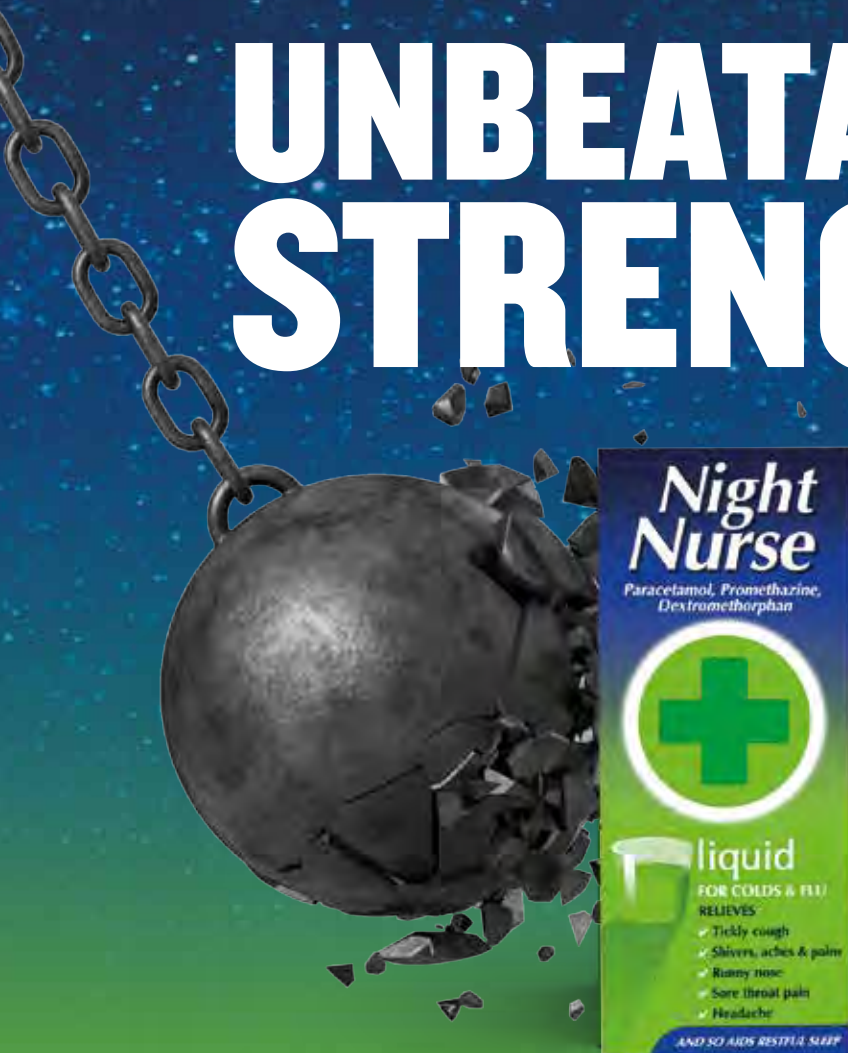

Remember to consider any other self care recommendations e.g. tissues & vitamins.

The majority of cold & flu symptoms are over in 4-5 days, but it can take up to 10 days or more for complete recovery.<sup>4</sup> Be aware that patients may attend the pharmacy at different stages of a cold and with different symptoms.

 Suitable for mild facial acne

**30g Gel and 100g Wash Gel**  
Suitable for mild to moderate acne  
100g Wash Gel suitable for acne on chest and back

## ADVICE FOR CUSTOMERS WHEN USING ACNECIDE PRODUCTS.

Benzoyl Peroxide treatments should be introduced slowly over several days, working up to a twice-daily application schedule, to allow skin time to build up tolerance.

Acneide products may cause increased sensitivity to sunlight/UV radiation. It is recommended to use daily SPF protection and avoid sun exposure.

Benzoyl Peroxide can cause irritation/dryness, however a non-comedogenic moisturiser can be applied after treatment to help prevent this.

NEW

# PURIFIDE

**INTRODUCING OUR LATEST RANGE  
OF COSMETIC PRODUCTS.**

Purifide can be used alongside our Acnecide range to provide a complete daily regime, helping to maintain the skin's barrier and tolerance of treatment.

**Rebalance skin:** soothing skincare to support a balanced, strong and healthy skin barrier. May be used as daily skincare alongside Acnecide treatments.

**Control:** daily control of the three causes of spots to prevent them and maintain clear skin. Also suitable for use once treatment period has finished.

**Acnecide Face 5% w/w Gel & Acnecide Face Wash 5% w/w Gel** contain Benzoyl Peroxide. **Indications:** Topical therapy for the treatment of mild acne affecting the face, when comedones (blackheads and whiteheads) predominate, and there are few or no papules and pustules (acne spots and pimples) and no inflamed spots. **Legal category:** GSL. Gently cleanses sensitive spot prone skin.

With soothing glycerin, liquorice root extract and zinc. A mild soap-free foaming formula with skin conditioning ingredients to respect the natural skin barrier. Reduces oil and shine leaving the skin feeling deeply cleansed and healthy.

**£9.99 RRP**

**DAILY MOISTURISER SPF 30**  
50ml

A lightweight, non-greasy moisturiser specifically formulated to hydrate and protect sensitive spot-prone skin.

With ceramides, liquorice root extract and allantoin to help soothe and strengthen the skin's barrier. Clinically proven to deliver hydration and high UV protection. Helps protect against skin photosensitivity and uneven skin tone with broad spectrum UVA/UVB filters.

**£14.99 RRP**

## CONTROL

**BLACKHEAD CONTROL**  
120ml

Deep exfoliating cleansing wash for blemish-prone skin on the face, chest and back.

With 2% salicylic acid, glycerin and hyaluronic acid to help unclog pores, keeping them clear to prevent spots.

**£9.99 RRP**

**PH CONTROL FACE WASH**  
150ml

For morning and evening use as part of a clear skin routine.

Contains gluconolactone, niacinamide and zinc, to soothe dryness and help reduce bacteria. Deeply cleanses and unclogs pores, maintains the skin pH and reduces bacteria to help prevent spots.

**£9.99 RRP**

**OIL CONTROL MOISTURISER**  
50ml

Clinically proven long lasting hydration + matte finish. Controls oil to help maintain clear skin.

With whitewood bark extract, known for its oil absorbing and pore refining properties. Eight hours shine reduction, all day hydration.

**£14.99 RRP**

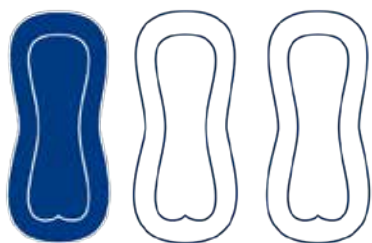

# HOW TO GROW YOUR INCONTINENCE BUSINESS

## AND MAXIMISE CUSTOMER SATISFACTION

# SIMPLIFYING CONTINENCE CARE FOR YOU AND YOUR CUSTOMERS

**1 in 3 women experience bladder sensitivity and incontinence<sup>1</sup>, but only 27% of them are using the right protection.**

## Prevalence of bladder weakness in the UK.

In the UK it is estimated that **between 3 and 6 million people experience some degree of urinary incontinence<sup>1</sup>**. It is a condition that affects both men and women, and is also more common with increasing age.

Urinary incontinence can happen for a number of reasons and is more common than many people realise. As many as 1 in 3 women over the age of 35 and 1 in 4 men over the age of 40 experience bladder leakage<sup>2</sup>. Additionally, many women are not currently using the right protection for their needs.

Only 27% use purpose made products specifically designed to handle bladder weakness<sup>2</sup>, as many women use period products to manage their incontinence. The result is ineffective care, and a compromised quality of life.

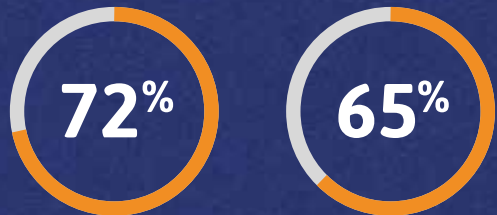

## A very relevant and growing category for pharmacies.

Bladder Weakness has a greater importance in the Pharmacy Channel due to the high level of education, advice and guidance required by the shopper/consumer. Equipping yourself with the right tools, products and merchandising for conversations on the topic will help generate greater customer satisfaction and loyalty. This document will help you capture this growth opportunity and help support your interactions with customers on the topic of continence care.

# THE PRODUCTS FAMILY CAREGIVERS

## REALLY VALUE

Research has shown that when it comes to continence care, shoppers prefer to go to pharmacies (where they have the option to speak to a knowledgeable expert) over and above other retailers.

72% of caregiver relatives and 65% of male and female shoppers prefer to shop in pharmacies<sup>3</sup>

### Understanding how customers find the right product for their needs

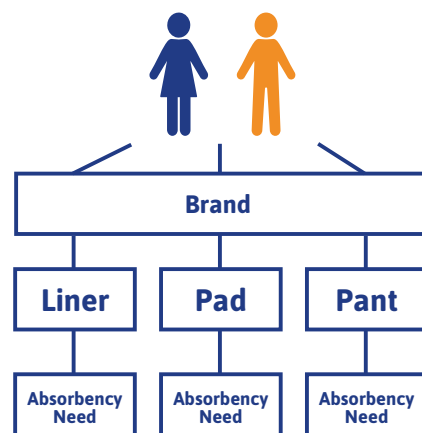

In the world of pharmacy, understanding and meeting the unique needs of your customers is the cornerstone of a successful business. By utilising consumer research and sales data, you can curate your product inventory to enhance customer satisfaction and foster the growth of your pharmacy.

To begin this journey, it's imperative to understand how consumers navigate the bladder weakness product range. Customers use the key leading brands in pharmacy as a beacon of trust and typically start their product search by identifying their preferred brand, followed by product format and then absorption level. Nielsen sales data in pharmacy also reveals that TENA dominates the bladder weakness category with an impressive 87% market share<sup>4</sup>. Always Discreet holds a 6% share of retail sales, while various smaller brands collectively constitute the remaining 7% of sales.

Delving deeper into the Bladder Weakness category, we see the majority of sales revenue, over half in fact, stems from the Pants format. This reflects a higher level of trust consumers place in healthcare professionals when dealing with more severe incontinence conditions. To be precise,

57% of incontinence sales are attributed to Pants, followed by 28% from pads, and a just 4% from Liners<sup>4</sup>. Moreover, the Men's category shows strong potential for growth within the pharmacy sector, boasting a remarkable growth rate of over 10% year on year<sup>4</sup>.

In light of this, it is essential to mirror this consumer preference in your fixture layout, aligning products with their respective subcategories. This strategy ensures your pharmacy is well-equipped to meet the needs of your customers effectively.

**57% of incontinence sales come from pants**  
**28% of sales come from pads**  
**just 4% come from liners**

# ARE YOU MAXIMISING

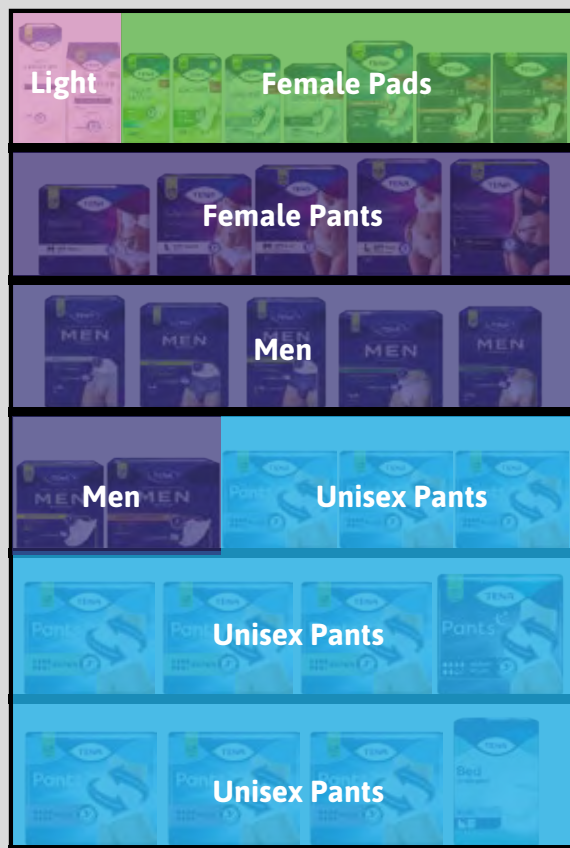

## YOUR INCONTINENCE SPACE?

### HOW TO DISPLAY YOUR PRODUCT RANGE TO MAXIMISE SALES

Your stock can be the most important financial asset to your business and implementing effective merchandising can deliver significant improvements to sales performance.

We want to help you provide an easy shopping layout for your customers, to ensure they can navigate your product display and find the right product for their needs.

We have created an easy-to-follow planogram that you can implement in your pharmacy, aligning product format and space to reflect their sales potential, as well as showing adjacent sub ranges for trade up opportunities. You can see this in the below example.

# KNOWLEDGE EQUALS CONFIDENCE

## HERE ARE SOME ADDITIONAL TIPS TO DRIVE CUSTOMER LOYALTY

### SIMPLIFYING THE SHOPPING EXPERIENCE

- Make products easy to find in the store and consider displaying products alongside other products that can benefit their situation (e.g. moisturizers or creams for improved skin health).
- Run in-store campaigns to improve product visibility and category awareness.
- Give samples for trial at home if it's helpful.

### WIDER HEALTH TIPS RELATING TO URINE LEAKAGE

- Be observant of medical conditions that can cause urinary symptoms: diabetes, stroke, Parkinson's disease and Multiple Sclerosis are a few examples. Always refer them to a healthcare professional to get a proper diagnosis and information on how to manage and treat the issue.
- Caffeine and alcohol reduction have a range of additional benefits, beyond helping reduce the occurrence of leaks.
- Remember to recommend drinking enough water – dehydration concentrates urine, which can promote an overactive bladder.
- Avoid drinking two hours before bedtime to help minimize night-time urination.
- Maintaining a healthy body weight and exercising regularly can help improve bladder health, as they encourage regular bowel movements, and help manage stress levels and psychological well-being.
- Some medications can also cause side effects that affect the bladder and bowel, so understanding what medication the shopper is on is also important.

### WIDER SKIN HEALTH TIPS

- Keeping the skin clean prevents irritations – for sensitive skin you can use barrier creams for protection.

# eroxon<sup>®</sup> STIMGEL

## A HEALTHCARE GUIDE TO A BREAKTHROUGH TREATMENT FOR ERECTILE DYSFUNCTION

Eroxon<sup>®</sup> is clinically proven to help erectile dysfunction sufferers achieve an erection in just 10 minutes, enabling spontaneity in intimate relationships. A physical mode of action contrasts with established treatments & explains adverse event & drug interaction profiles.

This guide introduces Eroxon<sup>®</sup> & enables pharmacy staff to assess its suitability for recommendation.

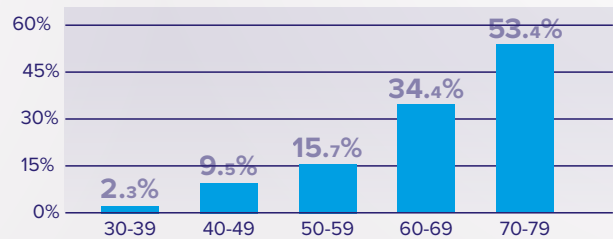

# ABOUT ERECTILE DYSFUNCTION (ED) EPIDEMIOLOGY

ED is a common condition, **with 3 in 4 men experiencing it** at some time in their lives.<sup>1</sup>

**ED prevalence increases markedly with age**, with a European study of 30-80 year-old men indicating incidence of 2.3% of men in their 30s and 53.4% in their 70s.<sup>2</sup>

ED can arise from **physiological** (organic) and **psychological issues**, which can overlap.

Research indicates that as many as **5 in 6 sufferers do not treat their condition**<sup>3</sup>

## TREATMENT OPTIONS

ED treatment was transformed in the late 1990s with the introduction of sildenafil – the first phosphodiesterase type 5 inhibitor (PDE5i) – as a prescription-only medicine.

Other prescription-only PDE5i's have been developed & sildenafil 50mg and tadalafil 10mg have been MHRA-approved for OTC sale.

PDE5i's have a systemic mode of action that results in them typically taking 30-60 minutes to take effect.

PDE5i's have a range of adverse events, including very common (more than 1 in 10) incidence of headaches.

PDE5i's have a range of contraindications, special precautionary warnings (e.g. cardiovascular risk factors) and drug interactions.

	Efficacy	Time of onset	Side effects	Availability
<b>Sildenafil</b>	✓	<b>Up to 30-60 minutes.</b>	<b>Headache, blushing, nausea,</b>	<b>Rx/OTC</b>
<b>Tadalafil</b>	✓	<b>Intake 1hr before</b>	<b>nasal congestion, dizziness,</b>	<b>Rx/OTC</b>
		<b>due to variability</b>	<b>back ache, heart issues</b>	
<b>Eroxon®</b>	✓ <sup>1</sup>	<b>5-10 minutes</b>	<b>Very low incidence</b>	<b>OTC/Medical Device</b>
			<b>of local irritation</b>	

1. 61% of treaters experience benefit from the product (mean IIEF-EF change versus baseline) FM71 reference

Research indicates that almost 50% of men discontinue use of PDE5i's within a year

Common reasons include efficacy, side-effects & comorbidities

3 IPSOS user study, USA 2017

# INTRODUCING EROXON® STIMGEL

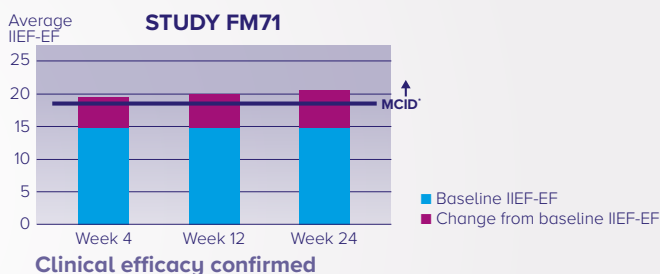

Eroxon® is a topical gel that is clinically proven to help a broad range of ED sufferers achieve an erection within 10 minutes.

As a medical device, Eroxon® has a physical mode of action that underpins a relatively low incidence of adverse events and drug interactions.

**1** Eroxon® exceeds the Minimal Clinically Important Difference (MCID) in both studies. MCID is the change in a treatment outcome that an individual would identify as important.

**2** 1/ 60% of erections occurred within 10 minutes of application  
2/ Faster speed of onset than oral PDE5i's  
3/ Over 60% of men with mild, moderate & severe erectile problems experienced a meaningful improvement in their erections using Eroxon®

**3** Overall satisfaction after 24 weeks of treatment

Two Phase 3 clinical trials: FM57: 250 subjects - FM71: 47 subjects

MCID is the **minimum clinically important difference** (4 units), Rosen RC, Allen KR, Ni X, Araujo AB. Minimal clinically important differences in the erectile function domain of the International Index of Erectile Function scale. Eur Urol. 2011;60(5):1010-6.

# FREQUENTLY ASKED QUESTIONS

## What is Eroxon®?

Eroxon® is a clear topical gel that is clinically proven to help ED sufferers achieve an erection within 10 minutes.

## Does Eroxon® work?

Eroxon® has been certified for OTC sale on the basis of efficacy and safety data that have been gathered from clinical trials that incorporated internationally-recognised standards.

## What does Eroxon® contain & how does it work?

Eroxon® contains ethanol, propylene glycol, glycerine, carbomer and pH modifier. Controlled evaporation stimulates nerve endings on the glans penis, leading to increased blood flow and stronger erections.

## Is Eroxon® effective in different types of ED circumstances?

Clinical studies have proven Eroxon® to be effective amongst mild, moderate and severe ED sufferers and where the condition is prompted by organic, psychological and mixed factors.

## What are the main differences between Eroxon® and oral ED medications (PDE5i's)?

Eroxon® can be applied as part of foreplay, works in just 10 minutes to enable spontaneity, has rare incidence of adverse events and has no drug interactions.

## How is Eroxon® used?

Rub a pea-sized amount of gel onto the glans (head) of the penis for around 15 seconds. This can be done by the man or their partner as part of foreplay.

## Does Eroxon® act as a lubricant?

No, due to its controlled evaporation. However, research into concomitant use of Eroxon® and a number of lubricants found no reason to discourage such use.

## Is Eroxon® safe for use with condoms?

Tests confirm Eroxon® to be suitable for use with latex condoms, which are the most popular in the UK.

## Is Eroxon® safe for use in oral & anal sex?

Biological tests indicate that Eroxon® is safe for use orally & anally.

## Are any special measures required to sell Eroxon®?

As a medical device, Eroxon® can be sold without pharmacy supervision or the need for questions.

Men experiencing ED should consult their doctor as soon as possible within the first 6 months of treatment to ensure that their erection problems are not caused by a serious health condition.

# SUMMARY OF TERMS

1. Where accounts have been approved for credit, payments are due 30 days from the month of invoice. Sigma Pharmaceuticals Plc reserves the right to charge interest on overdue accounts at the rate of 4% above the LIBOR (London InterBank Offered Rate) per month without prejudice to the right of recovery. Cheques payable to Sigma Pharmaceuticals Plc. Sigma Pharmaceuticals Plc reserves the right not to process the orders in case of an overdue account.
2. All orders and prices quoted are subject to the standard rate or reduced rate of V.A.T. on the NETT invoice value. The invoice date is the tax point for V.A.T. purposes.
3. Products on offer in the PLOF are not eligible for any further discounts.
4. All delivery enquiries must be notified within 24 hours of delivery
5. Prices are correct at time of going to print, but are subject to change without prior notice. Sigma Pharmaceuticals Plc reserves the right to amend any of their prices without due notice. Orders are accepted on condition that the goods will be invoiced at the prices ruling at the date of delivery. All images shown are for illustrative purposes only.
6. Invoice queries must be raised within one week of invoice date.
7. The goods shall remain the sole and absolute property of the seller and legal equitable owner until such time as the buyer shall have paid to the seller the agreed price together with the full price of any other contract with the seller.
8. Standard terms and conditions apply, as per trading terms, available upon request.
9. RSP's shown are supplied by the manufacturers and are correct at time of going to print. It is at the retailers discretion to set their own retail price and margin.

## CLAIMS AND RETURNS

### DELIVERIES

When accepting your delivery please ensure the number of boxes/bulk received match the drivers runsheet and that any discrepancies are clearly marked. Non-delivery must be notified to Sigma Pharmaceuticals Plc within 1 service day of invoice date or advice of despatch.

### RETURNS

Under existing rules and regulations issued by the DHSS and as published in "MAIL", goods will only be accepted for return by Sigma Pharmaceuticals Plc for the following reasons:

- To correct an error in delivery or ordering.
- In response to a product or batch recall instigated by a manufacturer.
- Where products or packages are alleged to be faulty.

In order to be considered for credit or replacement the goods must be accompanied by a note showing:-

- The name and address of the customer returning the goods.
- The quantity and description of the goods.
- The invoice number on which the goods were supplied.
- The reason of the return.

#### *Transfer Order Queries*

Call **01923 331 411** and ask for the Transfer Order Department.

#### *Expiry Date Queries*

Dates on products should be checked upon delivery. If you wish to return an item due to the date, please follow the return procedure mentioned previously.

#### *Items Missing From Delivery*

Call **01923 444 999** within 24 hours of delivery.

#### *Wrong Item Supplied*

Mark the required item with the code of 'B' on your invoice/return slip.

#### *Goods Ordered in Error*

Mark the item with the code of 'H' on your invoice/return slip.

#### *Goods Arrived Damaged*

Mark the item with the code of 'F' on your invoice/return slip.

#### *Recall Stock*

All recall stock must be written on a return slip with the date, quantity and reason code K.

# OTC & HEALTH AND BEAUTY TRANSFER ORDER OVERVIEW

Sigma offers a comprehensive transfer order service offering prompt deliveries, transparent invoicing and full advantage of manufacturers multi-level discounts (MLD) across a wide range of manufacturers.

## WHY USE SIGMA FOR TRANSFER ORDERS?

Our transparent invoice structure, quick turnaround and dedicated customer service means we are the preferred choice with manufacturers and third-party sales teams for transfer orders. Advantages of putting your transfer orders through Sigma:

- A minimum of 10% wholesaler discount on transfer orders\*
- Transparent discount structure
- More than 95% of products are available to order in singles
- Aim to deliver stock within 48 hours from receipt
- Back orders held for 60 days
- Dedicated transfer order team that can be directly contacted by telephone or email.
- Committed to ensure transfer order queries are resolved within 72 hours

\* Ethical and Rx Lines may not qualify for this discount

# DENTINOX<sup>®</sup>

For 60 years we've been making simple and effective medicines and medical devices to help bring gentle relief to baby.

Dentinox Teething Gel: For short-term use of no more than 7 days, where non-medicinal methods have not provided relief. For children from age 5 months.

Dentinox Cradle Cap Shampoo: Contains sodium lauryl ether sulpho-succinate and sodium lauryl ether sulphate, which are cleansing surfactants, proven effective in the treatment of cradle cap. For use from birth.

Dentinox Colic Drops: Contains Active Ingredient Activated dimeticone 21mg per 2.5ml dose. If symptoms persist speak to your health visitor, pharmacist or doctor.

Always read the label.

## NO.1 UK SEXUAL WELLBEING BRAND\*

Syphilis reaches  
**highest** level in  
England in a given year  
**since 1948#**

**\*\*1 in 3** UK  
shoppers have not used  
a condom in their last  
partnered occasion

**\*\*1 in 2**  
shoppers perceive  
that condoms  
reduce pleasure

Dr Sinka, Head of Sexually  
Transmitted Infections at UKHSA  
states condoms are the  
**"best defence  
against STIs"^^**

PIP Code: 385-7257  
**EXTRA SAFE**  
Easy-on shape for comfort  
& slightly thicker\*\*\*

PIP Code: 385-7190  
**THIN FEEL**  
Thin design for  
enhanced sensitivity

PIP Code: 426-2846  
**NUDE**  
Our thinnest condoms to date  
& designed to feel it all

PIP Code: 394-1192  
**PLAY FEEL LUBE**  
Water-based lubricant to help  
make sex more pleasurable

ENTEROSGEL

## ALL-IN-ONE IBS DIARRHOEA TREATMENT

SAFE &  
EFFECTIVE  
RELIEF OF:

- ✓ DIARRHOEA
- ✓ URGENCY
- ✓ BLOATING
- ✓ ABDOMINAL PAIN

Rated "Excellent"

"Works from the first dose!"

"Life changer!" "Got my life back!"

"Brand New Gut!" "Miracle cure!"

## How it works:

Oral Intestinal Adsorbent  
ENTEROSGEL passes along the gut, binding to bacterial toxins, immune chemicals and other harmful substances which can cause IBS symptoms, expelling them from the body via the stool.

For faster diarrhoea relief mix  
ENTEROSGEL with ORS or water

ENTEROSGEL passes through the gut  
binding to viruses and bacterial toxins,  
expelling them from the gut

Suitable for children 0+,  
safe and effective, clinically proven

# KOOL'n' SOOTHE

## Immediate and long lasting cooling relief for Migraine and Fever

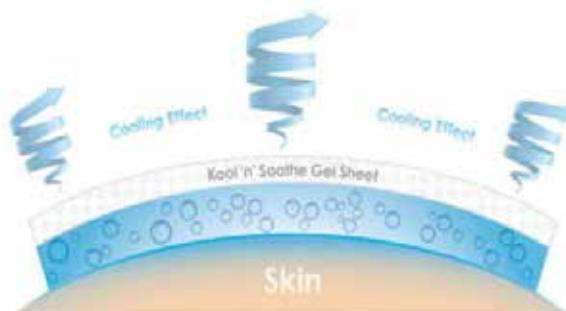

### Benefits

Long Lasting – Cooling effects last for 8 hours	Clean – The adhesive backing will not leave residue
Easy to use – Ready to use right out of the box	Non-Medicinal
Safe – It's safe to use with medication	No Smell – It is fragrance free
Secure – Adhesive backing keeps it in place	Convenient – No need for refrigeration

### How does Kool 'n' Soothe work?

The Kool 'n' Soothe gel sheet contains a high percentage of water which works with the bodies natural cooling system helping to cool the body. As the temperature rises the heat of the skin causes the evaporation of water contained within the Kool 'n' Soothe gel sheet. As a result Kool 'n' Soothe creates a cooling sensation on the surface of the skin.

# TIME TO TRY SOMETHING ELSE?

If a patient has already tried paracetamol or ibuprofen but have not got the relief they needed, you now have a new GSL option available to help them get back to feeling like themselves – **Nuromol Dual Action Pain Relief**.

**What makes Nuromol Dual Action Pain Relief different to single active products?**

**Nuromol Dual Action Pain Relief** contains interlocking paracetamol and ibuprofen,<sup>6</sup> which are released simultaneously to deliver a combination effect<sup>7</sup>

**Simple and convenient dosing:** Take 1 tablet, if 1 tablet does not control symptoms a maximum of 2 tablets may be taken, up to 3 times a day<sup>7</sup>

## 1x Nuromol Dual Action Pain Relief tablet

Provides **statistically superior pain relief than a 1 g paracetamol + 30 mg codeine** combination up to 12 hours<sup>2\*</sup>

6s & 16s also available.

## THINGS TO REMEMBER<sup>7</sup>

- Advise patients Nuromol Dual Action Pain Relief cannot be used alongside other oral or topical NSAIDs or paracetamol
- To minimise side effects, it is recommended that patients take Nuromol Dual Action Pain Relief with food
- If patients still need pain relief after using Nuromol Dual Action Pain Relief for 3 days, they should see their GP for advice

\*Based on a clinical trial.

Product Authorisation Holder: Dexcel® Pharma Ltd. 7 Sopwith Way, Drayton Fields, Daventry, Northamptonshire NN11 8PB, United Kingdom. Legal classification: GSL. Product name: Pyrocalm Control® 20mg Gastro-Resistant Tablets. Ingredients: 20 mg Omeprazole. Indications: For the short-term treatment of reflux symptoms (e.g. heartburn, acid regurgitation) in adults. Information about this product, including adverse reactions, precautions, contra-indications, and method of use can be found at: [www.medicines.org.uk/emc/product/9154](http://www.medicines.org.uk/emc/product/9154). Fertility, pregnancy and lactation: Pregnancy: results from three prospective epidemiological studies (more than 1000 exposed outcomes) indicate no adverse effects of omeprazole on pregnancy or on the health of the foetus/newborn child. Omeprazole can be used during pregnancy. Breastfeeding: Omeprazole is excreted in breast milk but is not likely to influence the child when therapeutic doses are used. Omeprazole can be used during breastfeeding. Fertility: Animal studies with the racemic mixture omeprazole, given by oral administration do not indicate effects with respect to fertility. 1 NHS Digital, Practice level prescribing data 2018/19 2 pubmed.ncbi.nlm.nih.gov/9692700/ 3 [www.statista.com/statistics/378445/prescription-cost-analysis-top-twenty-chemicals-by-items-in-england/](http://www.statista.com/statistics/378445/prescription-cost-analysis-top-twenty-chemicals-by-items-in-england/)

# ViraSoothe™

Clinically proven relief of chickenpox itch

## The benefits of Care ViraSoothe Gel

- ✓ Rapid cooling relief that relieves itching
- ✓ Helps break the ITCH, SCRATCH, INFECTION cycle
- ✓ Helps reduce scarring
- ✓ Can be used on body and face
- ✓ Safe to use from 6 months

## The added benefits of Care ViraSoothe Spray Gel

All the benefits of Gel  
plus

- ✓ Even quicker and easier to apply
- ✓ Involves less 'touching'
- ✓ Provides wider coverage

- NHS Choices recommends cooling gels for chickenpox<sup>1</sup>
- Media medic and family GP, Dr Sarah Jarvis advocates the use of Care ViraSoothe

Professionals endorse it

'It's worked wonders ...'

'Truly amazing stuff.'

'Really pleased with this.'

'Wonderful... a Godsend.'

Mums are discovering it

CE
